The automatic hand bundler **ONDASPOT[®]** is an ideal portable device for the professional fixing and marking of cable harnesses.

Taping of harnesses for the automotive and many other industries. Efficient, exact and secure with ONDAL taping automatics.

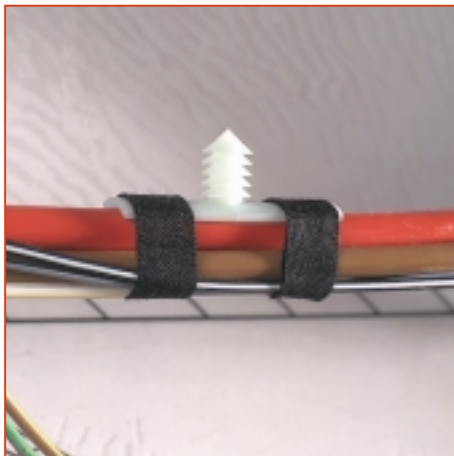

A PRACTICAL CONNECTION

ondal

FIXING AND MARKING IN A 3-SECOND-CYCLE-TIME

The automatic handbundler **ONDA SPOT**[®] is an ideal portable device. This device is useful for bundling wires and cable harnesses on lay up boards. Fixings and markings are easily and quickly attached at all positions of profile and laying boards.

ONDA SPOT[®] is highly efficient and light weight for simple operation.

Binding up of clips

ERGONOMIC GRIP MAKES OPERATION COMFORTABLE AND STARTING EASY

- ▶ Easy and flexible use.
- ▶ Fixing of clips on cables.
- ▶ Fast tape roll change.
- ▶ Very short production time, about 3 seconds including handling.
- ▶ Interchangeable taping heads.
- ▶ Low weight.

By using the guide and clamping unit a good result is guaranteed. The Ondaspot with "Comfort Fix" can be used at an angled or horizontal lay-up board.
