

VarioTaper

An automatic and efficient tapering process, and thereby time and material cost saving. Small and moveable - an innovation of **ondal**

The VarioTaper is small and portable. Therefore it can be used wherever tapering processes are made, at lay-up board workplaces or at conveyors. The mobile stand makes it flexible.

THE WINDING HEAD OPENS QUICKLY AND EFFICIENTLY. THAT MAKES IT USEFUL SPECIALLY FOR LONG HARNESSSES

THE VARIOTaper IS SIMPLE TO OPERATE

- ▶ lay the harness into the head where taping begins
- ▶ stick the tape to the wires, close the taping head and start at once
- ▶ Winding speed up to 400 min⁻¹ allows for high productivity
- ▶ open the head, cut the tape with the integrated knife- assembly complete

The integrated cutting knife eliminates the use of other tools

The VarioTaper brings mechanisation to the lay up board

- ▶ harness assembly at lay up board no longer excludes machine taping process
- ▶ the most economic process can be used
- ▶ the customer can now obtain quality machine taping at the lay-up board
- ▶ the machine can easily be adjusted for the optimum working height

THE TECHNICAL DATES

Power supply	230 V 50Hz
drive	servo motor
speed	100-400 r.p.m.
Harness-diameter	2 to 20 mm
Tape width	9 - 19 mm
tape rolls	1,5" centre 110 mm max. outside
optionally	1" centre
Tape quality	all different materials
safety	CE-approved
