

When your taping needs require the flexibility of a four head Pick & Place system, V-TEK's **TM-6000** automatic taping machine may be just what you are looking for. The machine features a four head turret assembly that will operate the four stations of this unit; pick, test, reject and place station. The simple design also incorporates the ability to rotate components between each station in the process.

Features :

- Four position Pick & Place heads for processing bowl or tube fed devices
- Each Pick & Place head can be independently set for various heights
- Ability to rotate components 90° between stations
- Interchangeable sealer / tooling for quick changeover
- Heat or PSA seal capabilities
- Handles tape widths from 8 – 32 mm
- Standard Empty Pocket Detector sensor
