

HALO BLAZE

H D T R

ECO-SHRINK-HDTR (HIGH TEMP) (PATENT PENDING)

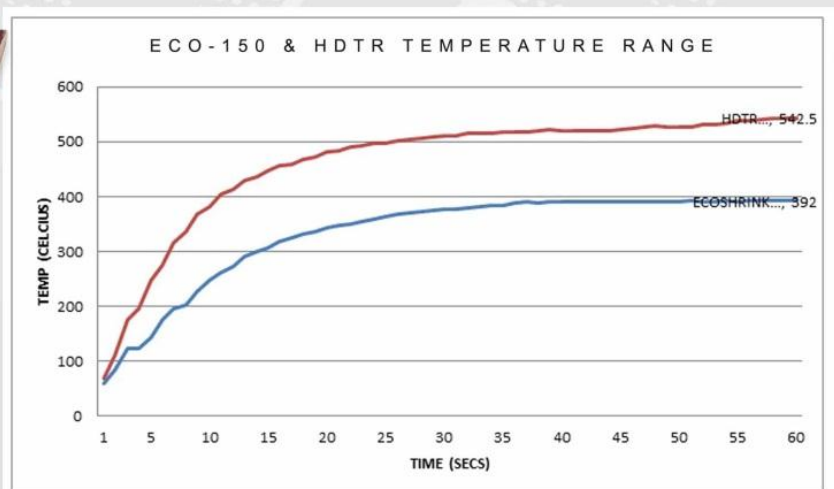

The new Haloblaze Eco-shrink HDTR was developed in addition to the standard model for increased heat output. This model allows for faster processing of lighter coloured materials and heavy duty applications.

The Haloblaze range has been designed to reduce the running costs of heat shrink tube processing. These new innovative machines not only reduce costs when compared with traditional heat gun methods but are faster, safer and give the operator full quality control over the shrink process.

Haloblaze utilises halogen technology to rapidly shrink tubing. Due to the quick heat up time, the machine only needs to operate for half the time of a traditional heat gun.

The Eco-shrink 150 is almost totally silent and keeps the heat generated within the machine, increasing safety whilst improving the working environment for operators.

- 360° SHRINKING WITHOUT TURNING
- USES UP TO 75% LESS ENERGY THAN A HEAT GUN
- NO BURNING OR SCORCHING
- TIME CONTROL
- HEAT INTENSITY CONTROL
- PHOTOMETRICALLY CERTIFIED PROCESS VIEWING WINDOW
- SILENT
- SAFE OPERATION
- HEAT SOURCE REPLACEMENT INDICATORS
- CONTINUOUS MODE FOR PROCESSING LONGER LENGTHS
- MULTIPLE PIECE PROCESSING IN ONE CYCLE
- EASY OPERATION & SET UP
- LOW COST CONSUMABLES
- TEMPERATURE MONITORING (OPTION)
- LIGHT WEIGHT & PORTABLE
- CE CERTIFIED & TESTED TO BS EN 62471

CAT

- 220-240VAC 50HZ 6 AMP
- 3X 400W 118MM HALOGEN R7 (UV FILTERED)
- PROCESSES UP TO 34MM OD
- TAPERED ENTRY SLOT OPENING 48MM
- CONSUMPTION 1200 W MAX
